The Huron™ Medical Assaulters Pack -X9 was designed to be low profile and extremely versatile. It's engineered utilizing the revolutionary TYR Tactical® PV® material which offers significant weight reduction with increased resistance to abrasion. Generous amounts of PALS/MOLLE webbing allow scalability for different mission sets and has several multifaceted adjustable internal compartments to fit different operator needs.

The inside of the X9 is completely lined with Velcro® loop. This design feature allows you to customize the internal pouch layout. It also gives the medic/operator immediate access to medical items for both self and buddy aid.
