

HURON™ HOT WEATHER BOONIE HAT

The Huron™ Hot Weather Boonie Hat is a new spin on a 40 year old design. We constructed the brim and top of the hat with newly developed 3.6 oz 100% ripstop nylon which gives it strength, comfort and reduces the overall weight. The circumference is made with poly mesh which quickens dry time in both arid and humid climates. It also allows excess heat to vent, further decreasing dry time. We went with 1" elastic webbing around the outside of the Boonie instead of the tradition nylon webbing. This ensures a secure fit of any foliage which may be used in conjunction with the hat.

Additional Features:

- Wt. 3.00 oz.
- Construction with 3.6oz 100% ripstop nylon, poly mesh and 1" elastic webbing
- Draw string with loop lock adjustment
- Compact and ultra-lightweight
