

HURON™ HOT WEATHER UNIFORM PANT

The Huron™ Hot Weather Uniform Pant is the culmination of years of materials and design research and development. Our goal was to provide operators with an extremely lightweight, quick drying, durable, hot weather uniform that would be the best performing and most comfortable combat garment they have ever worn. The end result was a combination of newly developed 3.6 oz 100% ripstop nylon, 4-way stretch tweave, poly mesh, and 4-way stretch polyester with X-Static® technology. This uniform is treated with No Fly Zone® and MCS® Blocker, it provides sun protection, and with the addition of X-Static® we have added anti-microbial, no odor, no static cling, and cooling properties.

FUNCTIONALITY:

The Hot Weather Uniform pulls from retro designs while simultaneously introducing cutting edge materials and features. We have eliminated unwanted weight through material selection and design. The finished product is 1.8 lbs. which is a full pound lighter than standard NYCO uniforms. The uniform is a slim cut which incorporates several adjustment points for a custom fit. We also used 4-way stretch tweave in critical areas where additional freedom of movement is required.

HRN-HWU107-P

ADDITIONAL FEATURES:

- Groin, waist band and knees incorporate 4-way stretch tweave for added range of motion, comfort, and abrasion resistance
- Universal Knee Pad Pockets
- Knee Cinching Tabs
- Two Front and Two Rear low profile slash pockets. The bottom of these pockets are constructed with poly mesh for water/debris drainage and airflow.
- Two Cargo Pockets with ventilation. Low profile design allows the pockets to lay flat when not in use
- Bar Button and Velcro® fly closure
- Boot Cuff Velcro® Cinching Tabs
- Internally Sewn, Poly Mesh Boot Gaiter
- Designed to work in-conjunction with the Huron™ Hot Weather Uniform Blouse (Sold Separately)
- Available in Regular and Long Sizes: 28", 30", 32", 34", 36", 38" & 40"
