**Design Features:**

The Male Enhanced PICO Integrated Carrier – **EPIC™** is a lightweight, 4-wire cutaway system. **EPIC™** incorporates a Front Plate Soft Ballistic Ridge™ which wraps around the plate. This provides an additional 1” of vertical ballistic protection around the top and bottom of the plate, protecting the end user from side spall created by plate fragmentation.

It’s engineered utilizing our revolutionary **PV®** material which offers significant weight reduction with increased resistance to abrasion. **PV®** has been tested to have 7-10 times higher abrasion resistance than standard mil spec nylon. **PV®** also enhances the ballistic attributes of armor within the vest.

Antimicrobial/FR treated padded spacer mesh is used internally for comfort.

The **EPIC™** is available in three different styles depending on the profile (thickness) of your plate:

- **EPIC 1** accommodates standard SAPI/ESAPI plates (approximately .75” thick)
- **EPIC 2** will hold Cercom & Ceradyne® plate styles (approximately .5” thick)
- **EPIC 6** will hold TYR-HA3/7 plate styles (approximately .5” thick)

**XFrame™ Compatible**
