The **TYR Tactical® Ballistic Shield Dolly** provides both load carriage and unmatched ballistic protection. The center armor panel covers the ballistic gap on both sides of the Dolly. Bolt holes on the armor panel are offset from the ballistic gap to reduce the possibility of penetration.

**OPTIONAL SET-UP:**

- **SINGLE SHIELD (FIGURE A):** Provides a ballistic barricade in the tilt forward position. It also functions as a load carriage dolly for Broco O2 Cylinders as well as mission specific MOLLE panels (Sold Separately).
- **DOUBLE SHIELD (FIGURE B):** Running this configuration, with the two wheel option, gives the user a load carriage dolly and standing, ballistic barricade with 360° movement. Two handle heights allow the user to push the dolly in their desired location. When in a fixed position, the user can run hands-free by simply tilting the TYR-RBS/BSD2 forward.

**FEATURES & SPECIFICATIONS:**

- Constructed out of high-strength, lightweight aluminum
- Telescoping frame to accommodate up to two shields (FIGURE C)
- Removable rear wheel (FIGURE D)
- Two wheel configuration allows for 360° movement.
- Dolly is self-supported in the two wheel configuration by resting on the lower shield
- Center armor panel reinforces the connection area where the upper and lower shields meet.
- Telescoping, pull pin, shield handle bracket for multiple shield sizes
- Two rubberized dolly handles
- Padded shield rest
- Three removable heavy duty wheels
- Matte black powder coat finish
- Two Wheel Configuration Wt. 28.7 lbs.
- Three Wheel Configuration Wt. 37 lbs.
